8 No Code Customization

New way to do customization

No Code Customization
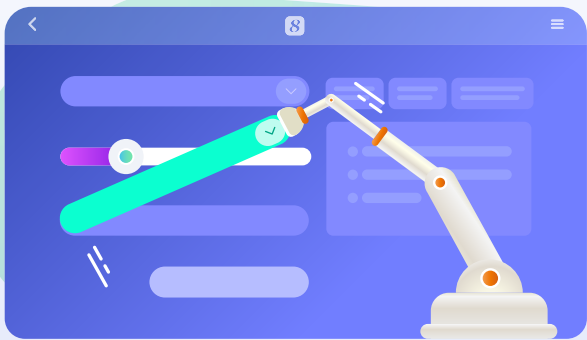

Point-and-click building blocks for extension

🎱 No Code Customization empowers your team to iterate and adapt the 🎱 applications quickly. Changes can be implemented in real-time, without the need for coding or software deployments. This agility enables your team to respond swiftly to evolving business needs and market trends.

Redefining existing business objects

8 allows your teams to modify the frequently used business objects such as clients, suppliers, quotations, contracts, invoices and payments.

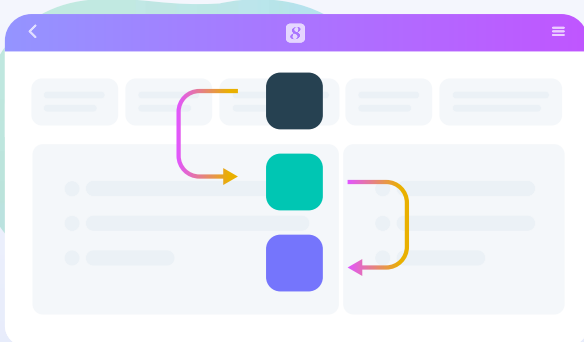

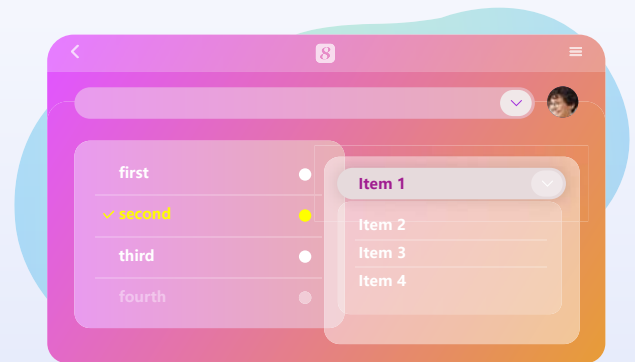

User redefined layouts

8 allows your teams to redefine the layouts of the following business objects: client, suppliers quotation, purchase request, sales order, purchase order, sales contract, procurement contract, invoice and payment.

User defined new fields

8 allows your teams to add new fields of the following types: Text(64), Text(256), Text(500), Text(2000), Number, Date, Date Range, Time, Time Range, Drop Down List, Radio Button, Check Box, Yes/No, Currency, Amount, System Object and Rating 1 to 10 in the existing business objects.

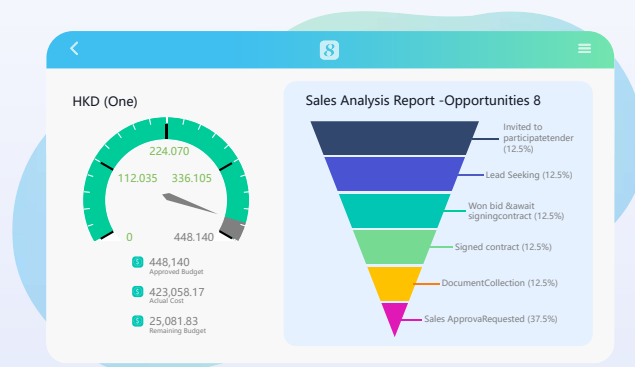

User redefined workflows

8 allows your teams to define and redefine the approval and navigation flows of all existing business objects.

User defined dashboards & reports

8 allows your teams to define and redefine the layouts of different real-time dashboards. 8 also provides your teams a point-and-click generator so that they can define and generate graphical display components and 2D and 3D reports to be displayed in the dashboards in real-time manner.

Defining new business objects

8 allows your teams to create new business objects and their workflows and link them to the existing menu structure.

User defined new business objects

8 allows your teams to define new business objects from scratch using user defined fields: Text(64), Text(256), Text(500), Text(2000), Number, Date, Date Range, Time, Time Range, Drop Down List, Radio Button, Check Box, Yes/No, Currency, Amount, System Object and Rating 1 to 10 in the existing business objects.

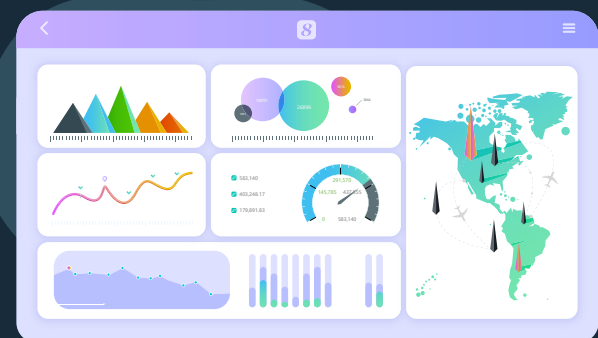

User linked new business objects to existing menus

8 allows your teams to associate the newly defined business object with a menu tab to be inserted in the desirable location of the existing menu structure.

User defined new business object workflows

8 allows your teams to define the approval and navigation flows of a newly user-defined business object.

User defined new business object dashboards & reports

8 allows your teams to define or redefine the layouts of new or existing dashboards. *8* also provides your teams a point-and-click generator so that they can generate graphical display components and 2D and 3D reports based on the data in the existing or newly defined business objects to be displayed in the dashboards.
